About Our Program:

The Florida Breast and Cervical Cancer Early Detection Program (FBCCEDP) has been awarded funding by the Centers for Disease Control and Prevention (CDC) since 1994. The grant is administered through the FBCCEDP central office and 17 lead County Health Department regional coordinators. Services provided, as funding allows, include:

- Breast and cervical cancer screening exams.
- Limited breast & cervical diagnostic services are reserved for women screened through the program.
- Care coordination & patient navigation for all clients with abnormal exams.
- Referrals by FBCCEDP to Florida Medicaid for qualifying women screened and diagnosed with breast or cervical cancer.

Florida Breast & Cervical Cancer

Early Detection Program

Serving Putnam, Alachua, Bradford, Columbia, Dixie, Gilchrist, Hamilton, Lafayette, Levy, Suwannee, and Union Counties.

Here Is How We Can Help!

Program Qualifications:

- Women at any age with a personal history of breast cancer, or who have completed treatment for invasive cervical cancer may be eligible
 - Women ages 50-64
 - Women ages 40-49 with a mother, sister, brother or father diagnosed with breast cancer may also be eligible.
- Uninsured or underinsured
- Not covered by Medicaid or Medicare
- At or below 200% of the federal poverty level
- Primary residence is in Florida

To see if you qualify, call your local county health department or visit WWW.MAKETIMEFORSCREENTIME.COM

What to Expect:

Mammogram or Clinical Breast Exam

- Undress from the waist up. Tip: wear a shirt that is easily removable.
- You may experience a feeling of pressure during your mammogram, but it will only last a few seconds.
- Breast exams and mammograms average between 10-15 minutes.

Cervical Exam

- A doctor will use an instrument called a speculum to gather cells from your cervix to test for any abnormal cells.
- If you experience any discomfort or become uncomfortable during an exam, let the health care provider know.
